

Drum Fill Idea - Inspired By Lionel Duperron

I wanted to quickly share this new drum fill concept with you. It was recently taught to me by my drum instructor, Lionel Duperron. He calls it the Trillion Fill Formula. You can literally come up with TRILLIONS of fills using this simple formula. He's giving more information away for free. Just go here: <http://DrumFillSystem.com> (signing up is quick, easy, and best of all, FREE. Enjoy!

- 1) Let's start with the drum fill in its simplest form.

- 2) Next, add in the bass drum on beats 1, 2, 3, and 4.

- 3) Now play 32nd note double strokes on all of the snare drum strokes (except the last).

- 4) And finally, add in the hi-hat along with the bass drum on all the quarter notes.
